

# Pathogen Control?

## how do I use Leucillin

Leucillin is skin pH neutral, non-toxic and will not sting, It is 100% safe to use in any application including eyes, ears and sensitive skin, simply spray liberally to use, recommended for use 2/3 times daily, allow to dry naturally.

To alleviate the symptoms of allergy suffers, liberally spray the affected areas to soothe and calm the external symptoms.

Available in five sizes  
50ml dropper, 60ml, 150ml, 250ml and 500ml Sprays

### testimonials and endorsements

#### Gun Dog Testimonial - First Aid

"I run a team of gundogs and as you can imagine knocks, cuts and scrapes are all in a day's work for human and canine, sadly two weeks ago our Springer got snagged on barb fencing. Thanks to Leucillin the wound is looking phenomenally better. First picture show size of the wound next one shows within 24hours and final one is just two weeks on."  
**Geena Olney, Fortiskeeper Spaniels**

#### Professional Endorsement - Lucinda Green MBE

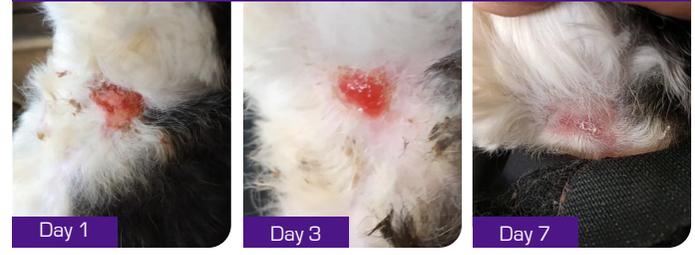

"What I have found magic about Leucillin is that whenever you are not quite sure what to do or put on, I just give a squirt of Leucillin - if it's a weepy eye, a smelly foot, a cut, a graze, a bite or some odd skin infection, they all have the same treatment. I find it so useful that I even carry a small, bottle in my handbag"

#### Dog Bite Injury - Giant Schnauzer

My Giant Schnauzer bitch was playing with my other Giant Schnauzer when things got a bit over excited and she ended up with a hole and skin flap at the front of her chest. I cleaned this 3-4 times daily with Leucillin only, using a tshirt as protection from dirt & dust. Leucillin is amazing stuff that works better than anything I've ever used before, would never be without it.  
**Penny Pickering & Reeba**

#### Skincare that's Safe for Cats

"Having struggled to find a long lasting solution to Poppy's chronic skin problem, (repeated outbreaks of weeping sores following an bacterial parasite infection), I am overjoyed to have found Leucillin. Not only is it fast working and effective but it doesn't make her suffer and more importantly I've been able to stop the repeated antibiotic treatments that are not good for any animals long term and especially not a young cat!"  
**Damaris Lambeth-Scott**
